

aixFOAM Solutions

Bespoke soundproofing – from design to regular delivery

- Consultancy, design and manufacture of effective and cost-efficient sound insulation components
- Personalised key account support and optimisation of your ordering processes
- Just-in-time delivery, from prototypes through to one-off production or recurring series production (small and medium-sized batches)
- State-of-the-art manufacturing technology, high quality standards and adherence to deadlines

All the information at solutions.aixfoam.en

With a wide range of specialised materials and finishes, we can solve your specific acoustic problem too.

Your industrial partner for bespoke sound insulation in electric vehicle manufacturing

- Integrated or retrofitted sound insulation solutions for electric vehicles
- Acoustic components designed to prevent the propagation of structure-borne noise, vibrations and material oscillations, and to dampen road noise
- Hard-wearing, durable components with special coatings to protect against dust, dirt, liquids and oils
- Prototype development, single-unit, small-batch and medium-batch production

We're here for you!
